 [liaHi19](#)

Software Developer with strong experience building modern, scalable web applications using React, TypeScript, and the Next.js ecosystem. Skilled in state management, complex form handling, and data-driven UI development, with backend experience in Node.js, REST APIs, and SQL databases.

Known for writing clear, maintainable code, improving legacy systems, and working closely with product and backend teams in Agile environments. Focused on performance, usability, and delivering high-quality solutions that meet business goals.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, HTML 5
- **State Management:** Redux, Redux Toolkit, React Context
- **Styling:** CSS3, Tailwind CSS, shadcn/ui
- **Form Handling:** React Hook Form, Zod
- **Backend & Database:** Node.js, Express.js, REST APIs
- **Tests:** Jest, React Testing Library

PROFESSIONAL EXPERIENCE

Front End Developer

N-and Group — Bristol, UK

Aug 2023 – Present

- Designed and developed a reusable component library using React, TypeScript, Tailwind CSS, and shadcn/ui, significantly improving consistency and reducing development time across multiple projects
- Built custom React hooks to encapsulate complex business logic and implemented the Intersection Observer API to trigger on-demand data fetching, reducing unnecessary API calls and improving performance

- Implemented a type-safe form validation system using React Hook Form with Zod schemas, providing real-time validation feedback and improving data integrity
- Developed and deployed RESTful APIs using Next.js, including authentication middleware
- Built advanced data tables with complex search, dynamic multi-filtering, efficiently handling large datasets
- Architected centralized state management with Redux and RTK Query and leveraging caching
- Developed interactive dashboards and analytics using ApexCharts, including custom tooltips, consistent date/time handling with date-fns
- Refactored a legacy JavaScript codebase into modern TypeScript and React, introducing hooks, functional components
- Actively participated in code reviews, pair programming, and Agile ceremonies, collaborating closely with product managers, designers, and backend engineers

React Developer

InventorSoft — Chernivtsi, Ukraine

March 2022 – July 2022

- Built reusable and scalable UI components using React.js, improving code maintainability and development efficiency
- Implemented Redux for state management across complex workflows, enhancing application performance and consistency
- Integrated Firebase for real-time data handling and user authentication in a NoSQL environment
- Styled applications using SCSS and Bootstrap to ensure responsive layouts across devices
- Improved form handling and validation using React Hook Form and Yup
- Debugged and resolved application issues to maintain performance and stability
- Used Git for version control, including branching and collaboration in team environments
- Collaborated with cross-functional teams in an Agile environment to deliver features aligned with project requirements
- Managed tasks and tracked progress using Trello to support efficient project delivery

EDUCATION

Firebrand Training - Software Engineer (Python)

May 2023 – Jul 2023

The Precarpathian National University

Diploma in Engineering (Biology)

2009 – 2014
